PROFILE

Programming student at UTN with experience developing mobile applications and REST APIs using React Native, Node.js, Express and PostgreSQL.

Currently focused on learning Docker, Linux and service deployment through personal projects hosted on a self-managed home server.

Experienced in building complete applications from frontend to backend and database integration, applying modular architecture, good development practices and version control with Git.

Looking for a trainee or junior developer position to continue growing professionally and improving my technical skills.

EDUCATION

National Technological University - Regional Faculty Haedo 2025 - Present(Estimated Graduation: 2026)
University Technical Degree in Programming

Technical High School N°1 Merlo 2015-2021
Technician in Electronics

CERTIFICATION & COMPETENCIES

- Python-3 Initial Level Certificate – UTN BA E-Learning.
- HTML, CSS, and JavaScript Certificate – Coursera.
- Git and GitHub Certificate – Coursera.

PROJECTS

Sistema de Gestión de Stocks - REST API 05-2026
Mobile application developed with React Native and Expo to help manage product stock for a small business.

- Product visualization, search and filtering
- Product creation, editing and deletion
- Multi-screen navigation using React Navigation
- Gesture Handler implementation for mobile interactions

Stack: React Native, Expo, TypeScript, Node.js, PostgreSQL, SSH, Docker, Linux

Shift Managment System - REST API 01-2026
Developed a scalable API for automated management of appointments, clients, employees, and finances.

- Implemented MVC architecture to ensure code maintainability.
- Integrated secure authentication using JWT (JSON Web Tokens).

Stack: Node.js, Express, PostgreSQL, TypeScript, Git.

WORK EXPERIENCE

Industrial Machinery Maintenance Technician (Temporary/Internship)

- Diagnosed and repaired plastic injection and blowing machines.
- Performed preventive and corrective maintenance on electromechanical systems.
- Resolved technical issues under pressure to minimize production downtime.

TECHNICALS SKILLS

Languages: JavaScript, TypeScript, Node.js, React, React-Native, SQL, C, C++.

Tools & Others: Git, GitHub, Docker, Linux, SSH, Docker Compose, Arduino.

Databases: PostgreSQL, Oracle SQL.

LANGUAGES

Spanish[native] | English [B1 - Intermediate]
